

# Groups & reports

- [Datasets groups](#)
  - Choose a [dataset](#) (CSV) by selecting a "DIAx *dataset*" group
    - Transform the dataset in 2 different graphs (bi-partite vs mono-partite)
    - Apply Graph mining on both graphs – queries + explanations
      - Show expected results
      - Reveal unexpected results
    - **1 report** (to be submitted)
- [Scientific paper groups](#)
  - Choose a [scientific paper](#) by selecting a "DIAx *paper*" group
    - The group can be different from the dataset one
    - Read the paper (eventually with bibliography)
    - Resume, link with GDS (possibility or required implementation)
    - Prepare a **presentation** (15min) for the last session (**submission** of PPT/PDF before)
